## MODERN MOBILE: HIGH DESIGN FOR TRAVELING HOMES

*The mobile home, though once overlooked and derided for its association with low-income trailer parks and roving gypsy caravans, represents a creative playground for designers. Relatively low overhead costs and virtually unending customization options make it an appealing medium on which to put an individualistic stamp. Plus, with such tight confines, uncommon design solutions are not only encouraged, but necessary.*

*Whether a classic Airstream or tow-able Tumbleweed log cabin, one thing remains constant: what is lost in terms of physical space is replaced by the prospect of a new view every morning. ❖*
